English Translation of a Report Originally Issued in Chinese

Independent Auditors' Report

To KGI Securities Co. Ltd.

Opinion

We have audited the accompanying consolidated balance sheets of KGI Securities Co. Ltd. (the “Company”) and its subsidiaries as of December 31, 2025 and 2024, and the related consolidated statements of comprehensive income, changes in equity and cash flows for the years ended December 31, 2025 and 2024, and notes to the consolidated financial statements, including the summary of material accounting policies (together “the consolidated financial statements”).

In our opinion, based on the reports of our audits, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries as of December 31, 2025 and 2024, and their consolidated financial performance and cash flows for the years ended December 31, 2025 and 2024, in conformity with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants, International Financial Reporting Standards, International Accounting Standards, Interpretations developed by International Financial Reporting Committee, or the former Standing Interpretations Committee as endorsed and became effective by Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company and its subsidiaries in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China (the “Norm”), and we have fulfilled our other ethical responsibilities in accordance with the Norm. Based on the reports of our audits, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of consolidated financial statements for the year ended December 31, 2025. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Assessment of Goodwill Impairment

The Company and subsidiaries perform impairment test annually on goodwill generated from business combination. Due to the complexity of testing assessment, management's subjective judgement to related assumptions, and significant goodwill amount as of December 31, 2025 to the consolidated financial statements, we considered the assessment of goodwill impairment as a key audit matter. Our audit procedures include, but not limited to, obtaining the self-assessment report from management and the impairment report prepared by external expert, and reviewing related assumptions used in calculating future cash flows in those reports. In addition, we use our firm's internal valuation expert to review the methods (such as discounted cash flow method) and the parameters (such as discounted rate) used in the impairment report to assist us to assess the methods and assumptions of goodwill impairment testing mentioned above. We also assessed the adequacy of disclosures for goodwill in Note V and Note VI.18.

Valuation of Derivative Instruments

The Company and subsidiaries invest in different types of derivative instrument assets and liabilities. As of December 31, 2025, the carrying amount of derivative instrument assets and liabilities measured at fair value is significant to the consolidated financial statement. Except for those classified as level 1, the fair value of other derivative instruments cannot be retrieved from active markets. Management therefore used valuation technique to determine the fair value. Level 2 derivative instruments are valued using parameters that are available or observable from an active market. The inputs of level 3 are not based on observable inputs from an active market. Since different valuation techniques and assumptions may have significant effect on the estimates of fair value, we considered the valuation of derivative instruments as a key audit matter. Our audit procedures include, but not limited to, assessing and testing the design and execution of the internal control regarding valuation, and reviewing management's verification on fair value and authorization process of valuation models. In addition, we used our firm's internal valuation expert to reevaluate derivative instruments on a sampling basis, and compared the outcomes with the one from management to assess if the difference is within acceptable range. We also assessed the adequacy of disclosures for valuation of derivative instruments in Note V and Note XII.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants, International Financial Reporting Standards, International Accounting Standards, Interpretations developed by International Financial Reporting Committee, or the former Standing Interpretations Committee as endorsed and became effective by Financial Supervisory Commission of the Republic of China and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the ability to continue as a going concern of the Company and its subsidiaries, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee or supervisors, are responsible for overseeing the financial reporting process of the Company and its subsidiaries.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Company and its subsidiaries.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability to continue as a going concern of the Company and its subsidiaries. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company and its subsidiaries to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the accompanying notes, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company and its subsidiaries to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of consolidated financial statements for the year ended December 31, 2025 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Others

We have audited and expressed an unqualified opinion including the Other Matter paragraph on the parent company only financial statements of the Company as of and for the years ended December 31, 2025 and 2024.

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the Years Ended December 31, 2025 and 2024

(Expressed in thousands of New Taiwan dollars unless otherwise stated)

I. Organization and Operations

KGI Securities Co. Ltd. (“the Company”) was established under the Company Act of the Republic of China (“ROC”) on September 14, 1988 to operate as a securities underwriter, dealer, broker, future trading, future dealer, trust, wealth management, offshore securities and commenced its operations since December 10, 1988.

The Company acquired and merged Taishin Securities Co., Ltd. on December 19, 2009. Therefore, the Company assumed all assets, liabilities, rights and obligations of Taishin Securities Co., Ltd.

KGI Financial Holding Co., Ltd. (formerly known as China Development Financial Holding Corporation, hereinafter referred to as “KGIFH”) announced the commencement of a tender offer on May 3, 2012. KGIFH had acquired 81.73% shares of the Company through the public tender offer period. The Board of Directors set January 18, 2013 as the record date for stock conversion on December 17, 2012. The Company became 100% owned subsidiary of KGIFH after the stock conversion. Meanwhile, the Company’s stock trading via OTC was suspended.

The Company merged Grand Cathay Securities Corporation (“GCSC”) on June 22, 2013. Therefore, the Company assumed all assets, liabilities, rights and obligations of GCSC.

The Company set up the Offshore Securities Unit (“OSU”) on April 16, 2014 which was approved by the Board of Directors and the authorities.

The Company’s registered address is 3F, No. 698 and 3F, No. 700, Mingshui Road, Taipei City. As of December 31, 2025, the Company had 72 branches including headquarter.

II. Date and Procedures of Authorization of Financial Statements for Issue

The consolidated financial statements of the Company and subsidiaries were approved and authorized for issue in accordance with a resolution of the Board of Directors on March 6, 2026.

III. Newly Issued or Revised Standards and Interpretations

1. Changes in accounting policies resulting from applying for the first time certain standards and amendments

The Company and subsidiaries applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised or amended which are recognized by Financial Supervisory Commission (“FSC”) and become effective for annual periods beginning on or after January 1, 2025. The adoption of these new standards and amendments had no material impact on the Company and subsidiaries.

2. Standards or interpretations issued, revised or amended, by IASB which have been endorsed by FSC, and not yet adopted by the Company and subsidiaries as at the date when the financial statements were authorized for issue, are listed below

<u>New, Revised or Amended Standards and Interpretations</u>	<u>Effective Date issued by IASB</u>
Amendments to the Application Guidance on the Classification of Financial Assets in Relation to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 1, 2026 (Note)
Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	January 1, 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	January 1, 2026
Contracts Referencing Nature-dependent Electricity – Amendments to IFRS 9 and IFRS 7	January 1, 2026

Note: Applicable to annual reporting periods beginning on or after January 1, 2026, entities may also choose to apply them early on January 1, 2025.

Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7

The amendments include:

- (1) Clarify that a financial liability is derecognised on the settlement date and describe the accounting treatment for settlement of financial liabilities using an electronic payment system before the settlement date.
- (2) Clarify how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features.
- (3) Clarify the treatment of non-recourse assets and contractually linked instruments.
- (4) Require additional disclosures in IFRS 7 for financial assets and liabilities with contractual terms that reference a contingent event (including those that are ESG-linked), and equity instruments classified at fair value through other comprehensive income.

As of the date of approval for the issuance of the financial report, the Company and its subsidiaries continue to assess the impact of these amendments.

3. Standards or interpretations issued, revised or amended, by IASB which have not been endorsed by FSC, and not yet adopted by the Company and subsidiaries as at the date when the financial statements were authorized for issue, are listed below

<u>New, Revised or Amended Standards and Interpretations</u>	<u>Effective Date issued by IASB</u>
IFRS 10 “Consolidated Financial Statements” and IAS 28 “Investments in Associates and Joint Ventures” — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures	To be determined by IASB
IFRS 18 “Presentation and Disclosure in Financial Statements”	January 1, 2027 (Note)
Disclosure Initiative – Subsidiaries without Public Accountability: Disclosures (IFRS 19)	January 1, 2027
Translation to a Hyperinflationary Presentation Currency (Amendments to IAS 21 and IAS 29)	January 1, 2027

Note: On September 25, 2025, the FSC announced in a press release that Taiwan will adopt IFRS 18 in 2028.

The potential effects of the standards or interpretations on the Company and subsidiaries’ consolidated financial statements are summarized as below:

- (1) IFRS 10 “Consolidated Financial Statements” and IAS 28 “Investments in Associates and Joint Ventures” — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures, in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint ventures. IFRS 10 requires full profit or loss recognition on the loss of control of the subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

IFRS 10 was also amended so that the gains or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors’ interests in the associate or joint venture.

(2) IFRS 18 “Presentation and Disclosure in Financial Statements”

IFRS 18 replaces IAS 1 Presentation of Financial Statements. The main changes are as below:

A. Improved comparability in the statement of profit or loss (income statement)

IFRS 18 requires entities to classify all income and expenses within their statement of profit or loss into one of five categories: operating; investing; financing; income taxes; and discontinued operations. The first three categories are new, to improve the structure of the income statement, and requires all entities to provide new defined subtotals, including operating profit or loss. The improved structure and new subtotals will give investors a consistent starting point for analyzing entities’ performance and make it easier to compare entities.

B. Enhanced transparency of management-defined performance measures

IFRS 18 requires entities to disclose explanations of those entity-specific measures that are related to the income statement, referred to as management-defined performance measures.

C. Useful grouping of information in the financial statements

IFRS 18 sets out enhanced guidance on how to organize information and whether to provide it in the primary financial statements or in the notes. The changes are expected to provide more detailed and useful information. IFRS 18 also requires entities to provide more transparency about operating expenses, helping investors to find and understand the information they need.

(3) Disclosure Initiative – Subsidiaries without Public Accountability: Disclosures (IFRS 19)

This new standard and its amendments permit subsidiaries without public accountability to provide reduced disclosures when applying IFRS Accounting Standards in their financial statements. IFRS 19 is optional for subsidiaries that are eligible and sets out the disclosure requirements for subsidiaries that elect to apply it.

(4) Translation to a Hyperinflationary Presentation Currency (Amendments to IAS 21 and IAS 29)

The amendments include:

A. Clarify that when the entity’s functional currency is that of a non hyperinflationary economy but its presentation currency is the currency of a hyperinflationary economy, the entity shall translate its results and financial position using the closing rate at the date of the most recent statement of financial position.

- B. In the above circumstances, when the presentation currency ceases to be hyperinflationary economy, the entity shall not retranslate amounts that arose before the beginning of the reporting period.
- C. When the entity's functional currency and presentation currency are the currency of a hyperinflationary economy, the entity shall apply the relevant accounting treatment in accordance with paragraph 34 of IAS 29.

The abovementioned standards and interpretations issued by IASB have not yet endorsed by FSC at the date when the Company and subsidiaries' financial statements were approved and authorized for issue, the local effective dates are to be determined by FSC. As the Company and subsidiaries are still currently determining the potential impact of the standards and interpretations, it is not practicable to estimate their impact on the Company and subsidiaries at this point in time. The remaining new or amended standards and interpretations have no material impact on the Company and subsidiaries.

IV. Summary of Material Accounting Policies

1. Statement of Compliance

The consolidated financial statements of the Company and subsidiaries have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Firms ("the Regulations"), Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants, International Financial Reporting Standards, International Accounting Standards, Interpretations developed by International Financial Reporting Committee, or the former Standing Interpretations Committee as endorsed and became effective by FSC of the ROC.

2. Basis of Preparation

The consolidated financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value.

3. Basis of Consolidation

Preparation principle of consolidated financial statement

Control is achieved when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Company controls an investee if and only if the Company has:

- (1) Power over the investee, i.e. the Company has existing right that gives the ability to direct the relevant activities;
- (2) Exposure or rights to variable returns from its involvement with the investee; and
- (3) The ability to use its power over the investee to affect the amount of the investor's returns.

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

When the Company holds voting rights or similar rights less than majority, it considers all relevant factors and situations to evaluate whether it has power over the investee, including:

- (1) Contractual arrangements with other investors that holds voting rights over the investee;
- (2) Rights arising from other contractual arrangements;
- (3) Voting rights and potential voting rights.

The Company reassesses its control over an investee when change in one or more of the elements occurs.

Subsidiaries are fully consolidated from the date of acquisition (the date on which the Company obtains control), and continue to be consolidated until the date that such control ceases. The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies. Account balances, transactions, and unrealized gains or losses and dividends resulting from intra-group transactions are eliminated in full.

A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction.

Total comprehensive income of subsidiaries is attributed to the owners of the parent company and to non-controlling interests even the later having a deficit balance.

If the Company loses control of a subsidiary, it:

- (1) Derecognizes the assets (including goodwill) and liabilities of a subsidiary;
- (2) Derecognizes the carrying amount of any non-controlling interest;
- (3) Recognizes the fair value of the consideration received;
- (4) Recognizes the fair value of any investment retained;
- (5) Recognizes any surplus or deficit in profit or loss; and
- (6) Reclassifies the parent company's share of components previously recognized in other comprehensive income to profit or loss.

The consolidated entities are as follows:

Investor	Name of the consolidated entities	Primary business	Percentage of ownership	
			12/31/25	12/31/24

Note 1: On October 23, 2024, KGI Futures resolved in its Board of Directors to conduct a capital increase through a cash issuance of 11,207 thousand common shares at a par value of \$10 per share. The subscription price was set at \$26.77 per share. The Company subscribed to 11,179 thousand shares, with a total subscription amount of 299,259 thousand dollars.

Note 2: KGI Capital Asia Limited resolved in its board meeting held on November 17, 2025 to sell all of its equity interests in PT KGI Sekuritas Indonesia to a non-related party. The subsequent equity transfer and delivery will be executed upon approval by the relevant competent authorities of the transaction counterparties.

Note 3: KGI Finance Limited subscribed to KGI Global Alpha Opportunities Fund with \$10,000 thousand in April and August 2025, totaling \$20,000 thousand. In November 2025, due to a decrease in shareholding percentage and thereby losing control, the fund was excluded from the consolidated financial statements.

- (1) The detail information of the scope of subsidiaries:

KGI Information Technology Co. Ltd. was liquidated in June 2025.

- (2) The name of each subsidiary not included in the consolidated financial statements, percentage of ownership, and the reason for its exclusion from the consolidated financial statements: not applicable.

4. Foreign Currency Transactions and Exchange Differences Resulting from Translating the Financial Statements of a Foreign Operation

- (1) The Company and subsidiaries' consolidated financial statements are presented in New Taiwan Dollars (NTD), which is also the parent company's functional currency. Each entity under the consolidated financial statements determines its own functional currency.
- (2) Transactions in foreign currencies are initially recorded by the subsidiaries at their respective local functional currency rates prevailing at the date of the transaction. Monetary assets and liabilities are retranslated at the rate of the reporting date. Non-monetary items measured at fair value are translated using the exchange rates at the date when the fair value is determined. Non-monetary items that are measured at historical cost are translated using the exchange rates at the date of the initial transactions.
- (3) The assets and liabilities of foreign operations and OSU are translated into NTD at the exchange rate on the reporting date and their gains and losses are translated at an average rate within the period. The exchange differences arising from the translations are recognized in other comprehensive income. On the disposal of a foreign operation or cessation of OSU business, the total cumulative amount of the exchange differences relating to that foreign operation should be reclassified from equity to profit or loss. Also accounted for as disposals when the partial disposal involves the loss of control of a subsidiary that includes a foreign operation, or when the retained interest after the partial disposal of an interest in a joint arrangement or in an associate containing a foreign operation is a financial asset that includes foreign operation.

- (4) On the partial disposal of a subsidiary that includes a foreign operation without loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in the other comprehensive income is re-attributed to the non-controlling interests. In partial disposal of an associate or joint arrangement that includes a foreign operation that does not lose significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profits or losses.
- (5) Any goodwill and any fair value adjustments to the carrying amounts on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and reported in its functional currency.

5. Current and non-current distinction

An asset is classified as current when:

- (1) The assets are expected to be realized, or intended to be sold or consumed it in normal operating cycle;
- (2) The assets are held primarily for the purpose of trading;
- (3) The assets are expected to be realized within twelve months after the reporting period; and
- (4) The asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period..

All other assets are classified as non-current.

A liability is classified as current when:

- (1) The liabilities are expected to be settled in normal operating cycle;
- (2) The liabilities are held primarily for the purpose of trading;
- (3) The liabilities are due to be settled within twelve months after the reporting period; and
- (4) Does not have the right at the end of the reporting period to defer settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

6. Cash and cash equivalents

Cash and cash equivalents comprises cash on hand, demand deposits, and short-term, highly liquid time deposits or investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

7. Financial instruments

Financial assets and financial liabilities are recognized when the Company and subsidiaries becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities within the scope of IFRS 9 Financial Instruments are recognized initially at fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets or financial liabilities.

(1) Financial assets: Recognition and Measurement

The Company and subsidiaries account for regular way purchase or sales of financial assets on the trade date.

The Company and subsidiaries classified financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss on the basis of both:

- A. the Company and subsidiaries' business model for managing the financial assets and
- B. the contractual cash flow characteristics of the financial asset.

Financial assets measured at amortized cost

A financial asset shall be measured at amortized cost if both of the following conditions are met and presented as notes receivables, accounts receivable, financial assets measured at amortized cost and other receivables, etc., on balance sheet as at the reporting date:

- A. the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- B. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Interest revenue calculated by using the effective interest method is recognized as profit or loss. Besides, interest revenue calculated by the below methods is also recognized in profit or loss:

- A. purchased or originated credit-impaired financial assets. For those financial assets, the Company and subsidiaries applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- B. financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company and subsidiaries apply the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Financial assets measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- A. The Company and subsidiaries' business model for managing the financial assets: the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- B. The contractual cash flow characteristics of financial assets: the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income are described as below:

- A. A gain or loss on a financial asset measured at fair value through other comprehensive income recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.
- B. When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.
- C. Interest revenue calculated by using the effective interest method is recognized as profit or loss. Besides, interest revenue calculated by the below methods is also recognized in profit or loss:
 - (a) Purchased or originated credit-impaired financial assets. For those financial assets, the Company and subsidiaries applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
 - (b) Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company and subsidiaries applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, at initial recognition, the Company and subsidiaries make an irrevocable election to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies. Amounts presented in other comprehensive income are not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and should be recorded as financial assets measured at fair value through other comprehensive income on the balance sheet. Dividends on such investment are recognized in profit or loss unless the dividends clearly represent a recovery of part of the cost of investment.

Financial assets measured at fair value through profit or loss

Except for the amortized cost measurement or measured at fair value through other comprehensive income which are accordance with the aforementioned specific conditions, financial assets are measured at fair value through profit or loss, and recognized as financial assets measured at fair value through profit or loss to present on the balance sheet.

This kind of financial assets are measured at fair value, and the benefit or loss which also includes any dividend or interest received on the financial assets should be recognized as profit or loss.

Impairment of financial assets

The Company and subsidiaries recognize a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial asset measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and not reduce the carrying amount in the statement of financial position.

The Company and subsidiaries measures expected credit losses of a financial instrument in a way that reflects:

- A. an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- B. the time value of money; and
- C. reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The loss allowance is measures as follow:

- A. At an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Company and subsidiaries measure the loss allowance for a financial asset at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that condition is no longer met.

- B. At an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
- C. For trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Company and subsidiaries measures the loss allowance at an amount equal to lifetime expected credit losses.
- D. For lease receivables arising from transactions within the scope of IFRS 16, the Company and subsidiaries measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Company and subsidiaries need to assess whether the credit risk on a financial asset has been increased significantly since initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note XII for the information about credit risk.

Derecognition of financial assets

A financial asset is derecognized when:

- A. the rights to receive cash flows from the asset have expired;
- B. transferred assets and substantially all the risks and rewards of the assets have been transferred;
- or
- C. the Company and subsidiaries have neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

If the transferred asset is a larger part of the financial asset and qualifies for derecognition in its entirety, the Company and subsidiaries allocate the previous carrying amount in two parts based on the relative fair values on the date of the transfer. The difference between the carrying amount allocated to the part derecognized, the sum of the consideration received and any cumulative gain or loss allocated to it that had been recognized in other comprehensive income, is recognized in profit or loss. A cumulative gain or loss that had been recognized in other comprehensive income is allocated based on the relative fair values.

(2) Financial liabilities and equity

Classification between liabilities or equity

The Company and subsidiaries classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. The transaction costs of an equity transaction are accounted for as a deduction from equity.

Financial Liabilities

Financial liabilities within the scope of IFRS 9 “Financial Instruments” are classified as financial liabilities measured at fair value through profit or loss or financial liabilities measured at amortized cost upon initial recognition.

Financial liabilities measured at fair value through profit or loss

Financial liabilities measured at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated as at fair value through profit or loss. A financial liability is classified as held for trading if:

A financial liability is classified as held for trading if:

- A. it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- B. on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- C. it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

If a contract contains one or more embedded derivatives, the entire hybrid (combined) contract may be designated as a financial liability measured at fair value through profit or loss; or a financial liability may be designated as at fair value through profit or loss when doing so results in more relevant information, because either:

- A. it eliminates or significantly reduces a measurement or recognition inconsistency; or
- B. a group of financial liabilities or a group of financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the company is provided internally on the fair value basis to the key management personnel.

Gains or losses on the remeasurement of this kind of financial liabilities including interest paid are recognized in profit or loss.

For the financial liabilities designated as measured at fair value through profit or loss, unless the treatment would create or enlarge an accounting mismatch in profit or loss, the amount of change in the fair value of the mentioned financial liabilities that is attributable to changes in the credit risk of that liability shall be presented in other comprehensive income; the remaining amount shall be presented in profit or loss.

A. Warrants liabilities and warrants redeemed

Warrants issued are accrued in the account of “Liabilities for warrants issued” and recorded by the fair value method on the gross basis. The repurchase of warrants issued, according to the full disclosure principle, is recorded in the account of “Repurchased warrants”, which is served as a contra item to the account of “Liabilities for warrants issued”.

B. Settlement coverage bonds payable of short sale

It represents liability to purchase government bonds to fulfill the obligation to deliver the bonds to third parties at a future date according to a short sell contract. When the deal was made, the Company received the sales consideration from the buyer and such money received was recorded in the revenue account. In addition, the market value of such bonds was recorded in both the cost of revenue account and the account of “Liability for purchase of government bonds”. At the balance sheet date, the account of “Liability for purchase of government bonds” was revalued using the fair value method and the difference between the cost and market value was recognized as the current period gain or loss.

Financial liabilities measured at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid or payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

(3) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(4) Derivative instruments

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Derivatives that are designated and effective hedging instruments are recognized as hedging financial assets/liabilities. Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss.

When the host contracts are either non-financial assets or liabilities, derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not designated at fair value through profit or loss.

(5) Hedge accounting

The Company and subsidiaries designate part of derivatives instruments as hedging instruments for fair value hedging.

When a hedging relationship begins, the Company and subsidiaries record hedging instruments, hedged items, goals of risk management and hedging strategies in paper. In addition, while hedging, the Company and subsidiaries continuously record whether hedging instruments can offset highly efficiently changes in fair value that are attributable to hedged risk in paper.

Fair value hedge:

With respect to the change in fair value of designated and matched fair value hedging instruments, if such change is attributable to hedged risk, it is recognized as net income or loss immediately.

The Company and subsidiaries postpone and stop using hedge accounting only if the hedging relationship does not meet the key item indicators of hedging accounting, including when hedging instruments are expired, sold, terminated or used.

8. Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (1) In the principal market for the asset or liability, or
- (2) In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Company and subsidiaries.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company and subsidiaries use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

9. Collateralized Securities Transactions

- (1) Collateralized securities transactions are recorded at cost. Under the financing method, securities purchased under agreements to resell and securities sold under agreements to repurchase are recorded at the amount of cash paid or received at the time of the transaction under "Investment in bonds with reverse repurchase agreements" or "Liabilities for bonds with repurchase agreements" accounts. The difference between the recorded cost and the amount, at which the securities will be resold or reacquired, as specified in the respective agreements, is accrued as interest expense or income.

- (2) When bonds purchased under resale agreements are short sold to third party for financing purpose, they are recorded in the account of “Investment in bonds with reverse repurchase agreements-short sales”, which is grouped under current liabilities in the balance sheet. At the balance sheet date, such items are recorded by the fair value method on the gross basis. When such items are covered, the resulting gains or losses are recorded in the account of “Gains/(losses) on covering of securities borrowing and short sales of bonds with reverse repurchase agreements-net”.

10. Customer Margin Accounts and Futures Customers' Equity

Customer margin accounts

Receiving margin deposits from customers for futures transactions as requirements is in accordance with the regulations. Customer margin account balances are calculated daily by marking to market the open positions of each customer and determining the required margin levels, recognized as current assets in the balance sheet.

Futures customers' equity

Margin deposits received from customers for futures transactions and futures customers' equity calculated daily by marking to market, recognized as current liabilities in the balance sheet. Futures customers' equity cannot be offset unless these accounts pertain to the same customers. The debit balance of “futures customers' equity”, which results from losses on futures transactions in excess of the margin deposits, is recorded as “futures commission merchant receivable.

11. Securities Borrowing Transactions

When the Company enters into securities borrowing transactions, the amount of sales of borrowed securities are recorded in the account of “Liabilities for securities and bonds borrowed”, which are adjusted to market value at the balance sheet date. “Market value” refers to the closing price at the balance sheet date. When the borrowed securities are returned, the resulting difference between actual cost of securities returned and the amount of “Liabilities for securities and bonds borrowed” is recorded as “Gains/(losses) on covering of securities borrowing and short sales of bonds with reverse repurchase agreements-net”.

12. Futures Transactions

These represent margins paid for the trading in futures and options by cash or securities are recognized as futures trading margins-proprietary funds/securities through evaluating day by day; options premium paid to the Taiwan Future Exchange upon purchase of options for trading is recognized as “purchase of options-futures”; options premium received upon sale of options is recognized as “liability on sale of options-futures”.

Realized gains or losses are recognized when the futures and options contracts are fulfilled. The difference between the average cost and market value is evaluated on the balance sheet date, and the unrealized gains and losses are recognized as “gains/(losses) on derivative financial product- futures”.

Margins paid for the futures over the original ones are recognized as “cash and cash equivalents”.

13. Non-current assets held for sale

Non-current assets or disposal groups held for sale refer to those that, under current conditions, can be sold immediately under normal terms and business practices, and are highly likely to be sold within one year. Non-current assets or disposal groups classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.

14. Investments accounted for using the equity method

The Company and subsidiaries' investment in their associate is accounted for using the equity method other than those that meet the criteria to be classified as held for sale. An associate is an entity over which the Company and subsidiaries have significant influence. A joint venture is a joint arrangement whereby the Company and subsidiaries have rights to the net assets of the arrangement.

Under the equity method, the investment in the associate or an investment in a joint venture is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Company and subsidiaries' share of net assets of the associate or joint venture. After the interest in the associate or joint venture is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Company and subsidiaries have incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. Unrealized gains and losses resulting from transactions between the Company and subsidiaries and the associate or joint venture are eliminated to the extent of the Company and subsidiaries' related interest in the associate or joint venture.

When changes in the net assets of an associate or a joint venture occur and not those that are recognized in profit or loss or other comprehensive income and do not affect the Company and subsidiaries' percentage of ownership interests in the associate or joint venture, the Company and subsidiaries recognize such changes in equity based on their percentage of ownership interests. The resulting capital surplus recognized will be reclassified to profit or loss at the time of disposing the associate or joint venture on a prorata basis.

When the associate or joint venture issues new stock, and the Company and subsidiaries' interest in an associate or a joint venture is reduced or increased as the Company and subsidiaries fail to acquire shares newly issued in the associate or joint venture proportionately to its original ownership interest, the increase or decrease in the interest in the associate or joint venture is recognized in additional paid in capital and investment accounted for using the equity method. When the interest in the associate or joint venture is reduced, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a pro rata basis when the Company and subsidiaries dispose of the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Company and subsidiaries. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company and subsidiaries.

The Company and subsidiaries determine at each reporting date whether there is any objective evidence that the investment in the associate or an investment in a joint venture is impaired in accordance with IAS 28 Investments in Associates and Joint Ventures. If this is the case the Company and subsidiaries calculate the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value and recognizes the amount in the ‘share of profit or loss of an associate’ in the statement of comprehensive income

Upon loss of significant influence over an associate or a joint venture, the Company and subsidiaries measure and recognize any retaining investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Also, when the Company and subsidiaries’ investment in an associate switches to investment in a joint venture, the Company and subsidiaries continue applying the equity method and do not revalue their retained earnings, and vice versa.

15. Property and equipment

- (1) Property and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. When (a) significant parts of property and equipment that are replaced is derecognized and (b) the new parts’ cost increase the carrying amount of the assets, the expense can be capitalized. All other repair and maintenance costs are expensed as incurred. Disposal gain or loss is recognized as current period’s other income and costs.
- (2) Depreciation is calculated on a straight-line basis over the estimated economic lives (not including land). The assets’ residual values, useful lives and methods of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate. If the expected values differ from the initial estimation, the change regards as changes in accounting estimation. The asset life for building is 55 years, and others are 2 to 10 years.

16. Investment property

Investment properties are measured initially at cost, including transaction costs, and not holding as operating rental or idle properties for rent income or capital increasing purpose. Assets are transferred to or from investment properties when there is a change in use, including transaction costs.

The asset life for building is 55 years, calculated on a straight-line basis over the estimated economic lives. Current depreciation is expensed.

Investment properties are derecognized when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal.

17. Lease

(1) The Company and subsidiaries as lessees

At the inception of a contract, the Company and subsidiaries assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company and subsidiaries assess whether, throughout the period of use, has both of the following:

- A. the right to obtain substantially all of the economic benefits from use of the identified asset;
and
- B. the right to direct the use of the identified asset.

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company and subsidiaries recognize right-of-use asset and lease liability for all leases which the Company and subsidiaries are the lessees of those lease contracts.

At the commencement date, the Company and subsidiaries measure the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company and subsidiaries use its incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

- A. fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- B. variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- C. amounts expected to be payable by the lessee under residual value guarantees;
- D. the exercise price of a purchase option if the Company and subsidiaries are reasonably certain to exercise that option; and
- E. payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

After the commencement date, the Company and subsidiaries measure the lease liability on an amortized cost basis, which increases the carrying amount to reflect interest on the lease liability by using an effective interest method, and reduces the carrying amount to reflect the lease payments made.

At the commencement date, the Company and subsidiaries measure the right-of-use asset at cost. The cost of the right-of-use asset comprises:

- A. the amount of the initial measurement of the lease liability;
- B. any lease payments made at or before the commencement date, less any lease incentives received;
- C. any initial direct costs incurred by the lessee; and
- D. an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

For subsequent measurement of the right-of-use asset, the Company and subsidiaries measure the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Company and subsidiaries measure the right-of-use asset applying a cost model.

If the lease transfers ownership of the underlying asset to the Company and subsidiaries by the end of the lease term or if the cost of the right-of-use asset reflects that the Company and subsidiaries will exercise a purchase option, the Company and subsidiaries depreciate the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Company and subsidiaries depreciate the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company and subsidiaries apply IAS 36 “Impairment of Assets” to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Except for those leases that the Company and subsidiaries accounted for as short-term leases or leases of low-value assets, the Company and subsidiaries present right-of-use assets and lease liabilities in the balance sheet and present lease-related interest expense and depreciation charge separately in the comprehensive income statements.

For short-term leases or leases of low-value assets, the Company and subsidiaries elect to recognize the lease payments associated with those leases as an expense on a straight-line basis.

(2) The Company and subsidiaries as lessors

At inception of a contract, the Company and subsidiaries classify each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset.

The Company and subsidiaries recognize lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

18. Intangible assets

Intangible assets include goodwill, customer's relation, computer software costs and other intangible assets. Intangible assets are initially recognized at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and impairment losses, if any.

Except for goodwill, the depreciable amount of an intangible asset with a finite useful life shall be allocated on a systematic basis over its useful life. Depreciable amount is the cost of an asset less its accumulated depreciation.

Gain or loss arising from derecognition of intangible assets is recognized as current period's gains or losses.

19. Impairment of non-financial assets

The Company and subsidiaries assess regularly whether there is any indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company and subsidiaries should test the assets individually or the cash-generating unit ("CGU"). When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. An asset's recoverable amount is the higher of its fair value or its value in use.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company and subsidiaries estimate the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation.

A CGU, which goodwill has been allocated is tested for impairment annually at the same time, irrespective of whether there is any indication of impairment. If an impairment loss is to be recognized, it is first allocated to reduce the carrying amount of any goodwill, then to the other assets of CGU pro rata on the basis of the carrying amount of each asset in the unit (group of units). Impairment losses relating to goodwill cannot be reversed in future periods for any reason.

An impairment loss of continuing operations or a reversal of such impairment loss is recognized in profit or loss.

20. Provision

Provisions are recognized when the Company and subsidiaries have a present obligation (legal or constructive) as a result of a past event. It is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a financial cost.

Provisions shall be reviewed periodically, and adjusted to reflect the most appropriate estimation currently. If the obligation of repayment is probably, the provisions shall be reversed.

The liability to pay a levy is recognized progressively if the obligating event occurs over a period of time.

Provision for decommissioning, restoration and rehabilitation costs

The provision for decommissioning, restoration and rehabilitation costs arose on construction of a properties and equipment. Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows and are recognized as part of the cost of that particular asset. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognized as a financial cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. Changes in the estimated future costs or in the discount rate applied are added to or deducted from the cost of the asset.

21. Revenue Recognition

The Company and subsidiaries' recognition criteria of revenues are as follows:

- (1) Brokerage handling fee revenue/expenses are recognized on the transaction date.
- (2) Gains/ (losses) on disposal of trading securities and related transaction costs are recognized on the transaction date.
- (3) Interest income/expense on margin loans and short sales of securities and bonds purchased under resale agreements, bonds sold under repurchase agreements are recognized respectively over the loan period on an accrual basis.
- (4) Consulting and financial advisory, revenue from underwriting business and related service charges are recognized according to the contracts or agreements on accrual basis.
- (5) Revenue from providing agency service for stock affairs is recognized according to the contracts based on the accrual basis.
- (6) Futures commission revenue is recognized on the transaction date and the Company assists in futures transactions and fees collection. Recognized according to the trading period based on the accrual basis.

- (7) Gain (losses) on futures contracts: The margin of futures transactions is recognized as cost. Gain (losses) on future contracts resulted from fair value measurement, reversing trade, or delivery is recognized daily. Costs and expenses are recognized as incurred.
- (8) Options transaction income (loss): The premium of options transaction is recognized as cost. The options are evaluated monthly based on the market value. Options transaction gains or losses arising from settlement are recognized in current period.
- (9) Dividends income is recognized when the Company's right to receive the payment is established.

22. Post-employment Benefits

All regular employees of the Company and domestic subsidiaries are entitled to a pension plan that is managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name in the specific bank account and hence, not associated with the Company and domestic subsidiaries. Therefore, fund assets are not included in the Company consolidated financial statements. Pension benefits for employees of the overseas subsidiaries and the branches are provided in accordance with the respective local regulations.

For the defined contribution plan, the Company and domestic subsidiaries will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan. The Company recognizes expenses for the defined contribution plan in the period in which the contribution becomes due. Overseas subsidiaries make contribution to the plan based on the requirements of local regulations.

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. The remeasurements of net defined benefit liability (asset) comprise returns on plan assets, changes in the effect of the asset ceiling, less net interest on net defined benefit liability (asset) and actuarial gains and losses. It is recognized under other comprehensive income and also immediately in retained earnings. Past service cost is the change in the present value of defined benefit obligation arising as a result of plan amendment or curtailment. Past service cost is recognized at the earlier of the following dates:

- (1) the date when a plan amendment or curtailment occurs; and
- (2) the date when an entity recognizes restructuring-related costs or termination benefits.

Net interest on the net defined benefit liability (asset) is determined by multiplying the net defined benefit liability (asset) by the discount rate, both determined at the start of annual reporting period, taking into account the changes arising as a result of contributions or payments.

23. Share-based Payment Transaction

The cost of equity-settled transactions between the Company and subsidiaries and the employees is recognized based on the fair value of the equity instruments granted.

This share-based equity-settled transactions recognized the wage expenses and the increase of equity during the vested period on the straight-line basis of the fair value mentioned above and the best estimate number of expected vested equity.

The recognized wage expenses are adjusted with the expected service criteria accordance and the prize quantity of non-fair value vested criteria; the final recognized amount is based on the vested quantity on the vesting date.

24. Income Tax

Income tax expense (income) is the aggregate amount included in the determination of profit or loss for the period in respect of current income tax and deferred tax assets or liabilities.

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

On the date of an earnings distribution approved by the shareholders' meeting of the Company and domestic subsidiaries, an income tax on undistributed earnings should then be recognized.

Pursuant to Alternative Minimum Tax Act ("AMT Act"), the higher of the amount of income tax payable determined pursuant to the Income Tax Act or the minimum amount prescribed under the AMT Act is recognized by the Company and domestic subsidiaries as income tax payable.

Since 2014, the Company adopted the linked tax system to file the consolidated income tax return under KGIFH. The calculation of income tax still follows the principle stated above. The tax receipts and tax payments arising from the consolidated income tax returns are used to adjust current period's deferred income tax assets (liabilities), income tax liability (asset) or income tax expense (income).

Deferred tax

Deferred income tax is temporary difference between the tax bases of assets and liabilities and their carrying amounts in financial statement at the reporting date.

If the temporary difference arises from the goodwill or other assets and liabilities on initial recognition (not including business combination), and the transaction do not affect the taxation income and accounting profit, it is not recognized as deferred tax assets and liabilities.

The taxable temporary difference arising from subsidiaries, associates, and the joint ventures shall be recognized as deferred tax liabilities, except the Company can control and probably will not reverse the taxable temporary difference in foreseeable future. Deferred tax assets arising from the deductible temporary difference of these kinds of investment and equity, and will reverse in foreseeable future, shall be recognized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and deferred tax liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed at each reporting date and are recognized accordingly.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

According to the temporary exception in the International Tax Reform – Pillar Two Model Rules (Amendments to IAS 12), information about deferred tax assets and liabilities related to Pillar Two income tax will neither be recognized nor be disclosed.

25. Business Combinations and Goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred, the identifiable assets acquired and liabilities assumed are measured at acquisition date fair value. For each business combination, the acquirer measures any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed when they are incurred.

If the business combination is achieved in stages, the acquirer's previously held equity interest is remeasured to fair value at the acquisition date through profit or loss.

Goodwill is initially measured as the amount of the excess of the aggregate of the consideration transferred and the non-controlling interest over the net fair value of the identifiable assets acquired and the liabilities assumed. If this aggregate is lower than the fair value of the net assets acquired, the difference is recognized in profit or loss.

Besides, Accounting Research and Development Foundation released the frequently asked question for IFRS 3 on October 26, 2018, and explained no specific rules for joint control of business combination in IFRS 3. Therefore, the rules for joint control of business combination still applied to interpretations released by Accounting Research and Development Foundations, R.O.C.

The business combination between Company and its affiliates is classified as a reorganization in accordance with EITF 100-390 of the Accounting Research and Development Foundation, R.O.C., and is recognized based on the carrying amount of the Company's Investments accounted for using the equity method (the amount after impairment loss); the long-term investments should be reclassified as assets and liabilities when its affiliates are eliminated. Further, according to EITF 101-301, the prior years' consolidated financial statements were restated. Additionally, the prior interest in the dissolved company held by parent company was presented as "prior interest under joint control" in the consolidated financial statements.

V. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the Company and subsidiaries' consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumption and estimate could result in outcomes that require a material adjustment to the carrying amount of the assets or liabilities affected in future periods.

1. Judgements

In the process of applying the Company and subsidiaries' accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the consolidated financial statements:

De facto control without a majority of the voting rights in subsidiaries

The Company and subsidiaries hold less than 50% of the invested company's shares and are the largest shareholder, who are judged to have no control and only have significant influence. Please refer to Note VI.11.

2. Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(1) Fair value of financial instruments

Where the fair value of financial assets and liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including income approach (for example: the discounted cash flows model) or market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note XII.5.

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(2) Goodwill

The Company and subsidiaries evaluate whether the goodwill impairs annually. Adopting appropriate discount rate to estimate the CGU's recoverable value of goodwill, and execute the impairment evaluation tests for goodwill. Please refer to Note VI.18.

(3) Income taxes

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company and subsidiaries establish provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective company's domicile.

Deferred tax assets are recognized for all carry forward of unused tax losses and unused tax credits and deductible temporary differences to the extent that it is probable that taxable profit will be available or there are sufficient taxable temporary differences against which the unused tax losses, unused tax credits or deductible temporary differences can be utilized. The amount of deferred tax assets determined to be recognized is based upon the likely timing and the level of future taxable profits and taxable temporary differences together with future tax planning strategies.

VI. Contents of Significant Accounts

1. Cash and Cash Equivalents

	<u>12/31/25</u>	<u>12/31/24</u>

Less than 30 days	629,575	125,751
30 to 60 days	5,717	7
61 to 120 days	14,516	4,870
More than 121 days	1,312	1,372
Total	\$77,696,542	\$48,018,822

(2) Please refer to Note VI.30 for details on accumulated impairment and Note XII for details on credit risk.

10. Non-current assets held for sale

KGI Capital Asia Limited resolved in its board meeting held on November 17, 2025 to sell all of its equity interests in PT KGI Sekuritas Indonesia to a non-related party. The subsequent equity transfer and delivery will be executed upon approval by the relevant competent authorities of the transaction counterparties.

As the above transaction meets the requirements of IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations", the related assets and liabilities of PT KGI Sekuritas Indonesia to be disposed of have been reclassified as non-current assets held for sale and related liabilities.

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

- (1) Details of non-current assets held for sale and related liabilities associated with the subsidiary PT KGI Sekuritas Indonesia are as follows:

	<u>12/31/25</u>
<u>Non-current assets held for sale</u>	
Cash and cash equivalents	\$102,123
Financial assets measured at fair value through profit or loss-current	111,861
Securities margin loans receivable	63,482
Accounts receivable	162,382
Other current assets	320,793
Financial assets measured at amortized cost-non-current	155,919

December 31, 2024	<u>\$420,495</u>	<u>\$102,810</u>	<u>\$523,305</u>

(2) Leases relating to investment property

The Company and subsidiaries' investment properties are owned investment properties. The Company and subsidiaries have entered into commercial property leases on its owned investment properties with lease terms of between 1 and 5 years. These leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions.

Leases of owned investment properties are classified as operating leases as they do not transfer substantially all the risks and rewards incidental to ownership of underlying assets.

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

A. Lease income for operating leases are as follows:

	For the years ended December 31	
	2025	2024
Rental income from the lease of investment property		
Income relating to fixed lease payments and variable lease payments that depend on an index or a rate	\$49,013	\$44,054

B. The undiscounted lease payments to be received and total amounts for the remaining period as of December 31, 2025 and 2024 are as follows:

	12/31/25	12/31/24
Not later than one year	\$46,304	\$45,806
Later than one year but not later than two years	44,520	40,560
More than two years but less than three years	29,645	38,849
More than three years but less than four years	21,917	24,166
More than four years but less than five years	-	16,606
Total	\$142,386	\$165,987

- (3) The investment properties are not measured at fair value but at cost. Its fair value is categorized as level 3 and it is only used for disclosure. The fair value of investment property held by the Company are all 1,421,029 thousand dollars as of December 31, 2025 and 2024. The management refers independent appraisal report and adopts the market valuation model to evaluate the fair value.
- (4) The investment properties are depreciated on a straight-line basis overestimated 55 years useful life.
- (5) Please refer to Note VIII for investment property pledged as collaterals.

Additions	-	144,105	-	144,105
Disposals	-	(988)	-	(988)
Amortizations	-	(94,016)	(164,471)	(258,487)
Exchange differences	59,821	925	-	60,746
December 31, 2024	<u>\$6,656,746</u>	<u>\$391,838</u>	<u>\$6</u>	<u>\$7,048,590</u>

- (2) The amortized lives for software and other intangible assets of the Company and subsidiaries are between 3 and 15 years.

17. Others Non-Current Assets

	12/31/25	12/31/24
Operation guarantee deposits	\$1,063,000	\$1,063,000
Clearing and settlement fund	785,040	631,146
Guarantee deposits	2,540,942	1,970,493
Long-term finance lease receivables	589,632	-
Others	416,554	321,939
Total	<u>\$5,395,168</u>	<u>\$3,986,578</u>

Please refer to Note VI.30 for details on accumulated impairment and Note XII for details on credit risk.

18. Impairment Test of Goodwill

Goodwill acquired by the Company and subsidiaries in business combinations is allocated to the brokerage business as the cash-generating unit. The recoverable amount of cash-generating unit from brokerage business is estimated based on value in use. The value in use is calculated by discounting projected cash flows over the next five years and cash flows generated beyond the five-year period are projected based on growth rate in perpetuity. According to the result of the Company and subsidiaries' impairment test of goodwill for the years ended December 31, 2025 and 2024, the recoverable amount is higher than the carrying amount. No impairment was recorded for the years ended December 31, 2025 and 2024.

Key assumptions used in the calculation of value in use

The value in use of the brokerage business cash-generating unit is most sensitive to the following assumptions:

- (1) Market trading volume
- (2) Discount rate

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Market trading volume-revenue of the brokerage business mainly comes from brokerage handling fee, which is closely related to the performance of the stock market. The company and subsidiaries comprehensively take factors into account, such as Taiwan's economy and international economic development to predict market trading volume over the next five years.

Discount rate-the Company and subsidiaries use required rate of return or weighted average cost of capital as discount rate, calculated by Capital Asset Pricing Model or Weighted-Average Cost of Capital Model. Capital Asset Pricing Model assumes that the required rate of return is risk-free rate plus Beta adjusted equity market risk premium plus size premium and firm-specific risk premium. The factors mentioned such as risk-free rate and risk premium are assessed annually based on publicly available market information and information of comparable firms. The Weighted-Average Cost of Capital Model is the calculation of the company's cost of long-term capital in which each category of capital is proportionately weighted.

	<u>The Company</u>	<u>Subsidiaries</u>
<u>2025</u>		
Growth Rate	2.21%	2.30%-2.50%
Discount rate	15.79%	6.87%-13.17%
<u>2024</u>		
Growth Rate	2.18%	2.40%-5.07%
Discount rate	15.03%	8.18%-18.30%

Variability of the assumptions

In terms of the value in use of the brokerage business cash generating unit, the management believes that the likelihood that the key assumptions will change is too low to lead to the excess of the book value of the cash generating unit over its recoverable amount.

19. Short-Term Borrowings

	<u>12/31/25</u>	<u>12/31/24</u>
Interbank loans	\$3,049,486	\$2,524,137

E. Credit risk valuation adjustment

The Company and subsidiaries' credit risk valuation adjustments could be mainly divided into two parts: Credit Value Adjustments, "CVA", and Debit Value Adjustments, "DVA", which are adjustments on credit risk valuation of derivative instruments traded at OTC. The purpose for the adjustments is to reflect the possibility of an opponent (CVA) or the Company and subsidiaries' (DVA) delay in payment and failure of receiving full amount of transactions' market value.

The Company and subsidiaries take an opponent's Probability of Default, "PD" (given the Company and subsidiaries do not default) and Loss Given Default, "LGD" into account, then calculate CVA with the opponent's Exposure at Default, "EAD". Contrarily, the Company and subsidiaries take their PD (given the opponent do not default) and LGD into account, calculate DVA with their EAD.

To take credit risk valuation adjustment into consideration for fair value of financial instruments and to reflect separately credit risk of the opponent and of the Company and subsidiaries, the Company and subsidiaries refer to Standard & Poor's, "S&P", historical probability of default for PD; base LGD on past experiences, scholars' suggestions, and foreign financial institutions' experiences; and adopt evaluated market price of derivative instruments as EAD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

- (1) The Company had issued 108-1 unsecured corporate bonds (hereinafter called “the Bonds-108-1”) amounted to 4,200,000 thousand dollars on November 22, 2019. The Bonds-108-1 were issued in three types: Bonds A were issued with three year maturities, amounted to 300,000 thousand dollars; Bonds B were issued with five year maturities, amounted to 2,600,000 thousand dollars; Bonds C were issued with seven year maturities, amounted to 1,300,000 thousand dollars, all of them at par value of 10,000 thousand dollars per bond. Other terms are listed below:
- A. Term to Maturity: Bonds A were issued on November 22, 2019 and will be redeemed on November 22, 2022; Bonds B were issued on November 22, 2019 and will be redeemed on November 22, 2024; Bonds C were issued on November 22, 2019 and will be redeemed on November 22, 2026.
 - B. Coupon rate: the coupon rate of Bonds A is 0.73% annually; of Bonds B is 0.78% annually; of Bonds C is 0.83% annually.
 - C. Repayment of principal: The principal of the Bonds will be repaid at maturity.
 - D. The Bonds-108-1 were issued without collaterals.
 - E. Interest payment method: The interest is paid annually and calculated on coupon rate by using simple interest method.
- (2) The Company had issued 110-1 unsecured corporate bonds (hereinafter called “the Bonds-110-1”) amounted to 5,000,000 thousand dollars on July 9, 2021. The Bonds-110-1 were issued in two types: Bonds A were issued with five year maturities, amounted to 2,300,000 thousand dollars; Bonds B were issued with seven year maturities, amounted to 2,700,000 thousand dollars, both at par value of 10,000 thousand dollars per bond. Other terms are listed below:
- A. Term to Maturity: Bonds A were issued on July 9, 2021 and will be redeemed on July 9, 2026; Bonds B were issued on July 9, 2021 and will be redeemed on July 9, 2028.
 - B. Coupon rate: the coupon rate of Bonds A is 0.51% annually; of Bonds B is 0.55% annually.
 - C. Repayment of principal: The principal of the Bonds will be repaid at maturity.
 - D. The Bonds-110-1 were issued without collaterals.
 - E. Interest payment method: The interest is paid annually and calculated on coupon rate by using simple interest method.
- (3) The Company had issued 113-1 unsecured subordinated corporate bonds (hereinafter called “the Bonds-113-1”) amounted to 3,000,000 thousand dollars on May 28, 2024. The Bonds-113-1 were issued at par value of 10,000 thousand dollars per bond. Other terms are listed below:
- A. Term to Maturity: The Bonds-113-1 were issued on May 28, 2024 and will be redeemed on May 28, 2034.
 - B. Coupon rate: the coupon rate of the Bonds-113-1 is 2.20% annually.
 - C. Repayment of principal: The principal of the Bonds will be repaid at maturity.
 - D. The Bonds-113-1 were issued without collaterals.
 - E. Interest payment method: The interest is paid annually and calculated on coupon rate by using simple interest method.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

27. Post-Employment Benefits

- (1) Description of employment pension:

Defined contribution plan

The Company and domestic subsidiaries established the employee retirement method that is defined contribution plan in accordance with The Labor Pension Act of the R.O.C. and the percentage of contribution burden by the Company and domestic subsidiaries are not less than 6% of employee's monthly wages and salaries. The Company and domestic subsidiaries contribute monthly an amount equal to 6% of employee's wages and salaries to the employee's individual pension fund accounts at the Bureau of Labor Insurance.

Foreign subsidiaries make contribution to the business related to pension management in compliance with local regulation.

Defined benefit plan

The Company and domestic subsidiaries adopt a defined benefit plan in accordance with the Labor Standards Act of the R.O.C. The pension benefits are disbursed based on the units of service years and the average salaries in the last month of the service year. Two units per year are awarded for the first 15 years of services while one unit per year is awarded after the completion of the 15th year. The total units shall not exceed 45 units. Under the Labor Standards Act, the Company and domestic subsidiaries contribute an amount equivalent to 2% of the employees' total salaries and wages on a monthly basis to the pension fund deposited at the Bank of Taiwan in the name of the administered pension fund committee. In addition, the Company and subsidiaries will assess the balance in pension fund at the end of the year; if the balance is not enough to pay the pension in the following year, the difference will be contributed before March in the next year.

Pension fund deposited in the Bank of Taiwan is utilized by Ministry of Labor in accordance with Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The investment strategy of the fund is to be managed by the Ministry itself or outsourcing, actively or passively in the medium or long term. Considering market, credit, liquidity risk, the Ministry of Labor set controlling plan and the limit for fund risk, allowing it to achieve its expected return without taking too much risk. Every year, the minimum return resolved to be allocated should not be lower than the return resulting from the interest of certificate deposits for two years. If it is not enough, it should be made up by National Treasury with the approval of authority. As of December 31, 2025, the defined benefit plan of the Company and domestic subsidiaries plan to contribute 63,686 thousand dollars in the following year.

The defined benefit plan for the company's subsidiary, PT KGI Sekuritas Indonesia, is performed in accordance with local regulation in Indonesia.

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

- (4) A. The main assumptions for defined benefit plan used by the Company and domestic subsidiaries are as follows:

	<u>12/31/25</u>	<u>12/31/24</u>
Discount rate	1.30%-1.34%	1.52%-1.53%
Expected Salary Growth Rate	3.00%	3.00%

Under the circumstance that all the other assumptions remain the same, if the material actuarial assumptions change reasonably and possibly, increase or decrease on the present value of defined benefit obligation will be as following:

	<u>12/31/25</u>	<u>12/31/24</u>
Discount rate		
Increase 0.5%	<u>\$(47,777)</u>	<u>\$(52,012)</u>
Decrease 0.5%	<u>\$50,902</u>	<u>\$55,599</u>
Expected Salary Growth Rate		
Increase 0.5%	<u>\$49,806</u>	<u>\$54,499</u>
Decrease 0.5%	<u>\$(47,253)</u>	<u>\$(51,530)</u>

- B. The assumptions for defined benefit plan used by the Company's foreign subsidiaries are as follows:

	<u>12/31/25</u>	<u>12/31/24</u>
Discount rate	6.75%	7.25%
Expected Salary Growth Rate	4.00%	4.00%

Under the circumstance that all the other assumptions remain the same, if the material actuarial assumptions change reasonably and possibly, increase or decrease on the present value of defined benefit obligation will be as following:

	<u>12/31/25</u>	<u>12/31/24</u>
Discount rate		
Increase 1.0%	<u>\$(478)</u>	<u>\$(381)</u>
Decrease 1.0%	<u>\$550</u>	<u>\$441</u>
Expected Salary Growth Rate		
Increase 1.0%	<u>\$570</u>	<u>\$459</u>
Decrease 1.0%	<u>\$(501)</u>	<u>\$(401)</u>

- C. When conduction sensitivity analysis, we analyze the possible effect of reasonably possible change of actuarial assumption (such as discount rate or expected salary growth rate) on defined benefit obligation assuming that all the other assumptions will remain the same. Since actuarial assumptions mutually relate to each other, it is rare that only one actuarial assumption changes. Therefore, there is limitation to this analysis.

- D. The method and assumptions used in current period's sensitivity analysis have no difference from the one in previous period.

KGI SECURITIES CO. LTD. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

28. Provision

	<u>12/31/25</u>	<u>12/31/24</u>
Litigation provision	\$141,640	\$134,305
Decommissioning liabilities	151,201	108,309
Total	<u>\$292,841</u>	<u>\$242,614</u>

29. Equity

(1) Common stock

	<u>12/31/25</u>	<u>12/31/24</u>
Authorized shares (thousand shares)	<u>4,600,000</u>	<u>4,600,000</u>
Authorized capital	<u>\$46,000,000</u>	<u>\$46,000,000</u>

The Company has issued 1,817,479 thousand common shares as of December 31, 2025 and 2024, respectively. The Company's issued capital was 18,174,785 thousand dollars as of December 31, 2025 and 2024, respectively, each at a par value of NT\$10.

(2) Capital reserve

	<u>12/31/25</u>	<u>12/31/24</u>
Additional paid-in capital	\$1,786,849	\$1,786,849
Treasury share transactions	364,435	364,435
Share-based payment	272,181	245,480
Surplus from business combination	4,999,288	4,999,288
Others	15,060	15,060
Total	<u>\$7,437,813</u>	<u>\$7,411,112</u>

Capital reserve needs to make up the company's deficiencies as priority. The company with no deficiency can issue all or portion of capital reserve in new stocks or cash and release to shareholders as their percentage by following the company law of shareholders' decision method. Capital reserve mentions in the former includes excess over par value of stocks and donations received.

(3) Distribution of earnings and dividend policy

A. The Articles of Incorporation of earnings distribution are as following:

For the operation and benefits of shareholders, the Company adopted surplus dividend policy in compliance with related regulations. The Company distributes cash dividends, and these cash dividends should not less than 10% of all dividends.

The Company should pay applicable income tax, offset accumulated losses, set aside legal reserve, and appropriate or reverse special reserve under relevant regulations before distribution of current net income. Appropriation of the remains along with the beginning balance of undistributed earnings shall be proposed by the Board of Directors and resolved by the shareholders.

- B. The Company held the annual meeting of shareholders (represented by the board of directors) on June 20, 2025 and June 21, 2024 and resolved the distribution of annual net income for 2024 and 2023, respectively, as follows:

	Distribution of earnings		Dividend per share (dollar)	
	2024	2023	2024	2023
Legal reserve	\$1,017,161	\$724,741	\$-	\$-
Special reserve	694,904	204,201	-	-
Cash dividends	8,459,545	6,318,464	4.654	3.476

- C. According to the Rule No. 1100365484 issued by FSC on January 21, 2022, when the Company distributes earnings, it must set aside (from current net income and the items other than current net income which would be added into current unappropriated earnings) special reserves equal in amounts to other net deductions from shareholders equity arising during that same year. Undistributed earnings from the preceding period are set aside if amount set aside from current net income and unappropriated earnings are not sufficient. Any other net deductions from shareholders equity items accumulated from the preceding year must not be distributed; instead, an equivalent amount must be set aside from undistributed earnings to special reserves. Thereafter, when other shareholders equity deductions are shifted back, the company may distribute earnings in an amount equal to the amount shifted back.
- D. As required by the Company Act, 10% of the current year's earnings, after paying all taxes and offsetting prior years' operating losses, if any, shall be set aside as legal reserve until the cumulative balance equals its paid-in capital. Except for covering accumulated deficit, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.

(10) Financial cost

	For the years ended December 31	
	2025	2024
Bonds	\$3,994,858	\$4,800,766
Bank borrowing	694,213	1,109,037
Short-term commercial papers and bonds	729,576	770,074
Corporate bonds	103,370	94,922
Lease liabilities	59,171	27,727
Securities lending refundable deposits	985,631	1,396,641
Others	374,848	459,723
Total	<u>\$6,941,667</u>	<u>\$8,658,890</u>

(11) Employee benefits expenses, depreciation and amortization

Item	For the years ended December 31	
	2025	2024
Employee benefit expenses		
Salary expenses	\$9,305,521	\$8,968,179
Insurance expenses	465,567	431,403
Pension expenses	301,619	286,111
Others	274,875	251,008
Total	<u>\$10,347,582</u>	<u>\$9,936,701</u>
Depreciations and amortizations		
Depreciations	\$842,908	\$721,932
Amortizations	116,321	258,487
Total	<u>\$959,229</u>	<u>\$980,419</u>

A. Due to the specialty of industry of the Company and subsidiaries, the employee benefit expenses and the depreciation and amortization expenses were classified as operating expenses.

B. The Company appropriates at least employees' bonus 0.1% and no more than directors' remuneration 1.0% of income before tax and before distributing earnings to employees and directors as employees' bonus income and directors' remuneration, respectively. The employees' bonus of 93,000 thousand dollars and the directors' remuneration of 132,000 thousand dollars were recognized under salary expenses based on the current year profit for the year ended December 31, 2025. The Company held the Board of Directors' meeting on March 6, 2025 and resolved the distribution of employees' bonus and directors' remuneration of 93,000 thousand dollars and 132,000 thousand dollars by cash, respectively.

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

C. The Company distributed the employees' bonus of 85,000 thousand dollars and the directors' remuneration of 120,000 thousand dollars for the year ended December 31, 2024, which have no difference from the expenses recognized in 2024.

D. The related information about employees' bonus and directors' remuneration from the earnings distribution plan adopted by the Company's board of directors' meeting can be inquired at Market Observation Post System.

(12) Other operating expenses

Recognized in other comprehensive income	(76,212)	(22,948)
Reclassified as held for sale	(18,534)	-
Ending balance	<u>\$(933,483)</u>	<u>\$(700,302)</u>

(5) Unrecognized deferred income tax assets

As of December 31, 2025 and 2024, the Company's subsidiary – KGI Futures' deferred tax assets have not been recognized in respect of unused tax losses, unused tax credits and deductible temporary differences amounting to 0 thousand dollars and 36,471 thousand dollars, as the future taxable profit may not be available.

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(6) Unrecognized deferred income tax liabilities

The Company and subsidiaries have no liabilities that may be used to increase any subsequent periods' income tax expense but not recognized as deferred income tax liabilities.

(7) Income tax return assessed

The income tax returns assessed of the Company and subsidiaries are as follows:

	<u>Assessment information</u>
The Company	Assessed through 2019
KGI Securities Investment Advisory Co. Ltd.	Assessed through 2023
KGI Insurance Brokers Co. Ltd.	Assessed through 2023
KGI Venture Capital Co. Ltd.	Assessed through 2023
KGI Futures	Assessed through 2023

(8) Administrative remedy

The income tax return of the Company for the years ended December 31, from 2015 to 2019 was assessed for additional income tax of 593,263 thousand dollars. The Company has appealed for administrative remedy. Additional income tax has been recognized into the financial statements.

(9) Pillar Two Rules:

The Pillar Two Rules have been legislated in the registered jurisdictions of some of the Company's overseas subsidiaries, including Hong Kong, Singapore, and Indonesia. According to the Pillar Two rules, the Company and subsidiaries are responsible for paying a top-up tax on the difference between the effective GloBE tax rate and the minimum tax rate of 15% in each tax jurisdiction. The Company and subsidiaries have assessed that the income tax exposure related to Pillar Two mainly arises from subsidiaries operating in the Hong Kong tax jurisdiction, and have recognized current income tax expenses for the related top-up tax.

33. Earnings Per Share

Basic earnings per share ("EPS") amounts are calculated by dividing net income for the year attributable to common stockholders of the Company by the weighted average number of shares outstanding during the year.

	<u>For the years ended December 31</u>	
	<u>2025</u>	<u>2024</u>
Basic EPS		
Attributable to the Company	<u>\$11,508,557</u>	<u>\$10,138,078</u>
Weighted average number of shares outstanding	<u>1,817,478,544 shares</u>	<u>1,817,478,544 shares</u>
Basic EPS (NT\$)	<u>\$6.33</u>	<u>\$5.58</u>

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Note1: According to the Financial Supervisory Commission's announcement on July 11, 2025 entitled "Regarding the IFRS Q&A on the Identification of Related Parties and Whether Retrospective Application is Required," the related rules applied to Company and its subsidiaries from the 2025 consolidated financial reports. After re-identifying the relationships and transactions with KGI Investment Trust Funds, they are no longer considered related parties. According to the Q&A, there is no need to restate the comparative period information or retrospectively adjust previously recognized and disclosed related party relationships and transactions in prior financial statements.

Property and equipment	4,095,816	4,126,262
Investment property	519,365	523,305
Total	<u>\$10,056,760</u>	<u>\$9,281,403</u>

Note: As of December 31, 2025, amounts related to non-current assets held for sale have been reclassified.

IX. Significant Contingent Liabilities and Unrecognized Commitments

1. One of the executive vice presidents of the merged entities, Jen-Hsin Securities Co., Ltd., claimed the ownership of stocks of Jen-Hsin Securities Co., Ltd. while certain clients of Jen-Hsin Securities Co., Ltd. also claimed ownership of the same lot of securities. The executive vice president declined to surrender the shares; hence, Jen-Hsin Securities Co., Ltd. petitioned a motion with the Taipei District Court on November 6, 2002 in order to repossess such shares. Because Jen-Hsin Securities Co., Ltd. has been merged into the Company, such case is taken over by the Company as a result. Also, in July 2004, the abovementioned clients requested the Court for the repossession of such shares from the Company, and the Company shall pay cash of 90,379 thousand dollars and assumed interest in lieu. During the process of litigation, said clients changed the claim to require the Company as first class debtor to pay 90,379 thousand dollars and assumed interest and executive vice president as secondary debtor to pay 2,000 thousand stocks of Jen-Hsin Securities Co., Ltd. and 73,946 thousand dollars and assumed interest because the original judgment has been rendered and the Company was unable to retrieve the stocks. The case was dismissed by the High Court on November 23, 2022. The abovementioned client died during the litigation procedure, therefore, the heir assumed the action. The heir filed an appeal against the judgment made by the High Court. On November 30, 2023, the Supreme Court overruled the abovementioned seventh instance retrial decision and returned it to the High Court for the eighth retrial. This case is currently pending by the High Court.

2. Securities and Futures Investors Protection Center sued the Company and claimed that due to the fact that the Company was the lead underwriter of Taiwan Kolin Co., Ltd. 2nd convertible bonds, and the Company failed to perform sufficient audits on the contents disclosed in the prospectus of Taiwan Kolin Co., Ltd. 2nd convertible corporate bonds, the Company constituted violation Articles 20 and 32 of Securities and Exchange Act and Article 184 and 185 of Civil Code. The plaintiffs sued the Company and Taiwan Kolin Co., Ltd. with jointly liability amounting to 133,308 thousand dollars plus 5% interest. The Taipei District Court ruled in the Company's favor in first instance on January 29, 2021. This case is currently pending at the High Court as Securities and Futures Investors Protection Center brought an appeal.
3. For the need of securities borrowing margin, the Company requested the bank guarantees for 6,300,000 thousand dollars.
4. The case of loan recovery between Global Treasure Investments Limited and Minda Consultancy Limited:

According to the loan contract signed on May 9, 2000, Global Treasure Investments Limited (GT) lent Minda Consultancy Limited (Minda) HKD 10,000 thousand dollars. However, Minda reneged on the contract and GT appealed to the Court against Minda for returning HKD 9,192 thousand dollars and additional interests. This case is currently in the process of Hong Kong court.

5. The contention about pledged stocks between Digital Imaging Solution Global Ltd., Minda Consultancy Limited, KGI Limited, and Global Treasure Investments Limited:

The plaintiffs, Digital Imaging Solution Global Ltd. (Digital) and Minda Consultancy Limited ("Minda") claimed that Global Treasure Investments Limited (GT) broke the pledged contract since GT and its fund manager including KGI Limited disposed 2,000 thousand shares of eCyberChina without the agreement of Digital and Minda based on the pledged stock derived from the loan, HKD 10,000 thousand dollars, between Minda and indirectly obtained the pledged stock 35,000 thousand shares of eCyberChina. Digital and Minda appealed to the Court and claimed HKD 119,130 thousand dollars and relevant expenses and interests against GT in November 2007. In February 2008, the plaintiffs also sued KGI Limited but the Hong Kong Court rejected the case on July 21, 2008. The plaintiffs appealed to the Court of Appeal and the Court of Appeal rejected Digital's appeal in December 2008. This case of Minda's part is currently proceeded by Court of Appeal.

X. Significant Disaster Losses

None.

XI. Significant Subsequent Events

The Company resolved in its board meeting held on February 4, 2026 to issue unsecured corporate bonds with a total issuance amount not exceeding NT\$15,000,000 thousand and a maximum issuance period not exceeding 20 years. After filing for approval with the competent authority, the Company will apply to be listed on the Taipei Exchange.

English Translation of Consolidated Financial Statements Originally Issued in Chinese
KGI SECURITIES CO. LTD. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

XII. Others

1. Financial risk management objectives and policies

(1) Financial risk management objectives

In order to manage the operation risk effectively and strengthen competitiveness, the Company formulates its risk management policies according to the regulatory requirements, KGIFH “Risk Management Policy” and the Company’s business development strategy, as its risk management guidelines.

(2) Risk management organization

The organization structure of risk management includes the Board of Directors, risk management department, business departments and other related departments in charge, which is built to monitor, plan and execute risk management. The Company’s business departments and back offices should comply with risk management regulations and report all anomalies and effects to Risk Management Committee (“RMC”) and Investment Review Committee (“IRC”) in time. The function and responsibility of risk management organizations are as follows:

The Board of Directors is the principal decision making unit for risk management. It undertakes ultimate responsibility for risk management and monitors the overall execution of the risk management system.

The primary function and responsibility of committees are as follows: RMC carries out decisions made by the Board of Directors; examines the Company and each department’s risk budgets, risk-based limits, and related management mechanism; considers risk management policies; and reviews risk reports submitted by each department to determine or adjust strategies accordingly. IRC examines securities underwriting, underwriting counseling cases, and general long-term investment cases. Merchandise Review Committee (“MRC”) establishes merchandise evaluation mechanism and reviews financial instruments before the Company makes transactions.

The Company’s business departments engage in formulating risk management mechanism, perform daily risk management and submit reports, and conduct internal control procedures in compliance with legal and risk management regulations.

Risk management department ensures risk management policies approved by the Board of Directors are executed; develops various risk management standards and guidelines, and measures and monitors daily risks in compliance with them; produces and submits risk management reports periodically (by day, week, or month) to key management; and constructs or assists in constructing risk management information system.

Legal affair department is responsible for providing legal consultations, drafting contracts, reviewing and preserving major contracts and monitoring litigation cases.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Legal compliance department is responsible for conveying laws, providing legal consultation, negotiating and facilitating communications. It is also responsible for making sure that all operations and management guidelines are up-to-date as related regulations are amended. It also supervises as all units conduct an overview of the feasibility of legal compliance.

Fund dispatching department handles all the requests and needs for funds from all departments and maintains loan commitments with financial institutions to lower capital cost and to manage capital liquidity risk.

Internal audit department inspects periodically how risk management guidelines are implemented in the Company and how business departments are operating and provide suggestions when necessary. It reports deficiencies or anomalies to the Board of Directors and follow up improvements.

Financial department, settlement department, information department, and other related departments should comply with risk management regulations, understand the risks originated from their activities, and take necessary risk management mechanism into account when establishing operation guidelines, and manage their delegated field, evaluation, price affirmation, profit or loss statement preparation, transaction process and confirmation, settlement activity, account affirmation, asset management, information security, and information maintenance.

(3) Risk management system

The content of the Company's structure of risk management system covers major risks faced by the Company which includes market risk, credit risk, liquidity risk, operating risk and legal risk.

The risk management policies, various risk management standards and operation of merchandise guidelines are established by competent unit. The competent unit makes a draft and asks the related department for the advice, constructs policies according to the parent company's regulations, then submits the proposal to RMC for approval.

(4) Risk management mechanism

The process of various risk managements includes risk identification, risk measurement, risk monitoring and control and risk reports. And the evaluation and the measurement of important risk are as follows:

A. Market risk

The Company restricts the risk level to which it is exposed to an acceptable level through structuring risk management system, enacting market risk management policies, and formulating merchandise operation guidelines. It also restraints risk through allocating venture capital, subject to management strategies and risk appetite, setting various risk-based limits, and conducting risk monitoring on a daily basis.

The Company implemented the MSCI Risk Manager, a market risk management system, as a quantitative management instrument. The system integrates all holding positions and provides in a daily basis various analyzing metrics and comprehensive computation results, including equity risk, interest rate risk, commodity risk, and exchange rate risk, etc., as well as adjustment and application of diverse derivatives models. Also, the risk management department controls risk-based limits by business units on the daily basis to enforce control of market risk and venture capital allocation.

To establish estimation effectiveness of value at risk (VaR) model, risk management department conducts back testing periodically. Additionally, it builds various scenarios for stress testing and scenario analysis, to understand the risk tolerance level of the Company.

B. Credit risk

The Company sets proper credit limits by considering the Company's net value, risk measurement and concentration of risk, and by taking into account the credit rating of issuers or counterparties, the traits of transactions, and the characters of instruments, etc. The Company would periodically inspect the credit records of counterparties, holding positions, and collaterals, then report the use of various credit risk limits to key management as well as related departments.

While considering the credit risk of counterparties, the Company adapts the third parties' credit evaluations, such as TCRI of Taiwan Economic Journal, Taiwan Ratings, S&P, Moody's and Fitch. The Company compares its own evaluation to the third parties' results to categories of levels 1 to 9. The Company updates the information about counterparties and credit evaluations of transactions timely and the Company is able to adjust the limit of credit risk while evaluation changes.

To properly manage the Company's credit risk, the risk management department applies for credit risk capital toward Board of Directors annually. Establish proper credit risk expected loss limitation amount relating to the whole company, single level, or single firm, etc. Also, set Pre-settlement Risk (PSR) limits and different risk limitation amount including countries, industries, groups, high-risk industries/groups, etc. Routinely examine the Company's credit risk exposure and the use of various credit risk limitation amount.

C. Liquidity risk

The liquidity risk could be divided into two categories: market liquidity risk and fund liquidity risk. The measurement of market liquidity risk is the trading volume of holding position of the Company and serves as the basis of information disclosure. The fund liquidity risk management has established independent fund transfer unit, considering the timing and net cash flow of need by various departments, to effectively control the fund liquidity risk.

D. Operating risk and other risks

All units conduct operation risk management respectively by their own business. This management contains authorization related to operation risk, process, operation content, plan following the division of front and back desk operation and principle of segregation of duties. Operation risk controls include information security and maintenance, clearing, trade confirmation, statements preparation, segregation of duties, relating party trade control as well as the internal control, etc.

Each unit is responsible to examine and control its own business operating risk. In addition to the compliance of law and regulation, the internal audit department would implement control by the regulation and procedure of internal control system to ensure the effectiveness of risk management.

In the event of abnormal occurrences in any unit, the Company shall follow the “Operation Guidelines Governing the Reporting and Handing Procedures of Abnormal Events and Significant Incidents”. The audit unit will report the incident to the Chairman and the auditor of the Parent company depending on the importance of the abnormal event in order to manage the loss efficiently. When there is a significant risk event, the Company follows the “Key Points of Reporting Significant Risk” of the parent company and the Company’s “Operation Guidelines Governing the Reporting and Handing Procedures of Abnormal Events and Significant Incidents”. The risk management unit will review and see if this significant event is reported in time.

The Company is qualified for adopting Delta-Plus sensitivity analysis method for options under advanced calculation of Bank of International Settlement ratio for securities companies. In order to calculate BIS ratio and other financial commodity valuation models required for other statutory ratios, the Company has implemented model management.

The Company detects operation risk regularly. The detection items include financial institution capital adequacy, asset qualities, management abilities, profitability, liquidity, sources of profit, foreign exposure, investment positions, off balance sheet items and client complaints or arguments. Each detection and warning indicator is evaluated by the specific unit according to the review frequency. The responsible unit will send the result and the variation information to the risk management sector for monitoring and filing purposes.

(5) Risk hedge and mitigation strategy

The Company has set up policies such as the “Handling Procedure of Selling and Buying Securities and Trading Derivatives Financial Instruments” and the “Operation Guidelines of Operating Derivatives Financial Instruments”, in order to hedge and reduce the risk, the policies are as follows:

A. Before conducting a transaction of derivatives, each segment shall first make sure whether the nature of the transaction is trading or hedging. After the transaction is conducted, the nature of the transaction cannot be changed at will.

B. The nature of the transaction shall refer to selling and buying derivatives at the expected prices bearing risks in order to make gains by the price difference. Hedging shall refer to trading derivatives to reduce the market risk of assets or liabilities or expected transactions.

C. The positions held for hedging shall include both the hedging position and hedged position as a portfolio and be aware of the profit/loss changes between the hedging and hedged positions.

2. Analyses of credit risk

(1) Source of credit risk

The credit risks that the Company and subsidiaries are exposed to during financial transactions include issuer's credit risk and counterparties' credit risk, etc.

A. Issuer's credit risk refers to the risk of financial loss that the Company and subsidiaries face while possessing financial debt instruments or deposits in banks when an issuer (or guarantor) or a bank defaults, files for bankruptcy or liquidates assets and in turn cannot honor the stipulations and fulfill the obligation of paying back (or fulfilling a guarantee).

B. Counterparties' credit risk refers to the risk of financial loss that the Company and subsidiaries face when counterparty in derivative financial instrument transaction does not complete a transaction or fulfill a payment obligation on the appointed date.

(2) Credit risk management

The credit risk management of the Company and subsidiaries' investments, fixed-income securities and other financial assets and counterparties are managed by each business unit subject to the internal control procedures and relevant specifications. As most of the investments and counterparties reach a good external credit rating, credit risk is extremely low.

(3) Definition of default and credit impairment of financial assets

A. The Company and subsidiaries define default of financial assets, the same as impairment of financial assets. If there are any evidence indicating issuers or counterparties are not able to fulfill contractual obligations or they have financial difficulty, such as:

- I. Issuers and counterparties have bankrupted or it is becoming probable that they will enter bankruptcy or other financial reorganization;
- II. A breach of contract of the issuers and counterparties' other financial instruments has occurred;
- III. The disappearance of an active market for that financial asset because of financial difficulties; or
- IV. The purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

- B. The above mentioned definition of default and credit impairment apply to all the financial assets held by the Company and subsidiaries, which is consistent with the definition used for internal credit risk management purposes for the relevant financial instrument.
- C. When financial assets don't meet definition of default and impairment after assessment, they will not be recognized in credit-impaired financial assets any longer.
- D. The Company and subsidiaries shall directly reduce the gross carrying amount of a financial asset when they have no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. A write-off constitutes a derecognition event.

(4) Description of credit risk on each financial asset

A. Cash and cash equivalents

The Company and subsidiaries mainly put bank deposit and cash in the banks with good credit and deposits specific amount of cash as collateral in the customers' margin account designated by the future corporations. The Company and subsidiaries regularly assess finance, operating activities and credit risk situation of each financial institution and future corporation, which serves as the management of credit risk. Considering the result of assessment, the credit risk is under control.

B. Financial assets measured at FVTPL-current

The above mentioned financial assets include debentures, convertible bonds and CB Asset Swap. The debentures held by the Company were issued by large-scale listed corporations or financial institutions; the convertible bonds held by the Company were issued by domestic listed corporations and parts of them are backed by bank guarantees. As the Company transfers the credit risk through issuing CB Asset Swap and Credit Linked Note in order to reduce issuers' exposure to credit risk, the issuers' credit risk is under control.

C. Financial assets measured at fair value through other comprehensive income (excluding equity instrument investments) and financial assets measured at amortized cost

The abovementioned financial assets are mainly long-term bonds. The Company keeps a close eye on credit grade of each investment and issuer' (or credit rating agency) financial situation in order to minimize the credit risk.

D. Investment in bonds with reverse repurchase agreements

The counterparties with whom the Company and subsidiaries do bond investments with reserve repurchase agreement are mainly the financial institutions and corporations with good credit. The factor that counterparties' securities are held by the Company and subsidiaries as collateral effectively reduces counterparties' exposure to credit risk.

E. Receivables

Receivables include securities margin loans receivable, trading securities receivable, futures commission merchant receivable and accounts receivable. The main credit risk is Securities margin loans receivable and trading securities receivable. The Company and subsidiaries closely monitor market fluctuations and customers' credibility and take measures to minimize the credit risk according to the regulations.

F. Customer margin accounts

As the specific accounts of customer margin are opened in the banks with good credit and financial institutions and corporations with investment grade, there is no significant credit risk.

G. Stock borrowing collateral price and security lending deposits

When the Company borrow securities, the Company should deposit margin in the specific financial institutions. The factor that securities are held by us reduces counterparties' amount of exposure to credit risk.

H. Others non-current assets

Other non-current assets include operation guarantee deposits, clearing and settlement fund and guarantee deposits. The Company and subsidiaries assess counterparty based on the materiality of the amounts deposited. As there are many counterparties and the amount of that is not significant, the credit risk is effectively decentralized. Therefore, the credit risk is extremely low.

(5) Measurement of expected credit losses

A. Consideration of the forward-looking information

The Company and subsidiaries consider the forward-looking information to decide if there is a significant increase in credit risk and to measure expected credit losses.

The probability of default used for measuring impairment on debt instrument investments, excluding ones measured at fair value through profit or loss, is based on probability of default information including forward-looking macroeconomic information published regularly by international credit rating institutions.

Apart from debt instrument investments, analyses on financial instruments are performed using historical data. Economic factors relevant to expected credit loss of each portfolio have been identified with reference to optimal estimations published by authorities or academic institutions. Optimal estimations are reevaluated and corrected on every financial statement date.

B. Receivables and others

The Company and domestic subsidiaries

The Company and domestic subsidiaries measure the loss allowance by lifetime expected credit loss under IFRS 9. The lifetime expected credit loss is based on the historical experience, current information and forward-looking information and calculated by regression model. Considering the Company and subsidiaries' historical experience, since no significant difference exists among different client groups, grouping analysis is not conducted.

The foreign subsidiaries

As the credit loss of financial assets recognized initially is not significantly increased, they are measured by 12-month expected credit loss. Otherwise, they are measured by lifetime expected credit loss. The measurement is based on customers' past record of default, credibility, current information and prospective information. Since no significant difference exists among different client groups, grouping analysis is not conducted.

C. Debt instrument investments (excluding ones measured at fair value through profit or loss)

The above mentioned instruments were at low credit risk upon acquisition, and an assessment is made at each reporting date as to whether the credit risk has substantially increased and whether the credit has been impaired. The assessment is categorized into " Low credit risk (Stage 1) ", " Credit risk significantly increased (Stage 2) " and, " Credit-impaired (Stage 3) ". The Company and subsidiaries mainly determines whether credit risk significantly increases since initial recognition based on external credit rating and the rating change (being downgraded from investment grade to non-investment grade or the rating since initial recognition is lowered to a certain grade), and that other market information related to the issuer indicating significant increases in credit risk. The Company and subsidiaries also consider credit impairment based on default financial difficulties, bankruptcy, financial restructuring or a combination of impacts from certain events that may cause credit impairment on the financial assets. If the credit risk on financial assets is considered low on the balance sheet date, the Company and subsidiaries shall measure the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses as the credit risk is assumed to not significantly increase since initial recognition; and the Company and subsidiaries shall measure the loss allowance for financial assets at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly or been impaired since initial recognition.

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

In order to measure expected credit loss, The Company calculated both 12-month and lifetime expected credit losses by considering the 12-month and lifetime probability of default, loss given default multiplied by exposure at default which is measured using amortized cost of financial assets, and taking into account the effect of time value of money.

The probability of default is the probability of breaching a contract by issuer or counterparty; the loss given default is the loss ratio when they breach a contract. Both of them are based on the information on probability of default and loss given default published regularly by international credit rating institutions.

- (6) The assessment technique or significant assumption used to evaluate the expected credit loss by the Company and subsidiaries have no change for the years ended December 31, 2025 and 2024.

3. Analyses of capital liquidity risk

Amount of cash flow gap	\$126,529,201	\$(110,982,380)	\$34,717,465	\$(3,215,850)	\$3,201,620	\$50,250,056

The Company has established statement of capital liquidation gap to estimate the financial assets and liabilities in future cash flows which can affect the Company and subsidiaries when it comes to fund dispatching. The cash flow gap statements as of December 31, 2025 and 2024 show that the sums from deducting cash outflow from cash inflow are 52,322,140 thousand dollars and 50,250,056 thousand dollars, respectively, all indicating sufficient fund liquidity.

Although an analysis of funds gap shows that part of periods of the cash outflow exceeded cash inflow. Net cash inflow calculated from net spot financial assets are sufficient to cover the other periods of net cash outflows, an indicator of sufficient fund liquidity.

(2) Control mechanism of capital liquidity risk

The independent fund-dispatching department established by the Company takes into consideration the needs of net cash flow and their timings from various departments and predicts future cash flows based on the requests submitted by departments with a need for funds. The department has also established a simulation analysis mechanism for capital flows after considering short-term capital dispatching in Taiwan as well as international or cross-market transactions in order to better predict future needs of funds and set up contingency measures.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

The Company also offers suggestions over a secure amount of reserve fund and reports it to the President. The department reviews the standard amount of reserve capital and will take the following action if available capitals (including cash, short-term investment and available financing credit) are below 120% of the safe reserve amount:

- A. Except all due payments and those whose use of capital cannot be restricted due to the nature of their business, all the requests for capitals from all business departments need to be approved by the fund-dispatching department in order to maintain a safe amount of reserve capital.
- B. Fund-dispatching department will hold a meeting with relevant departments to formulating emergency measures, which includes disposal of low yield or unnecessary assets, expanding repurchase agreements with the Central Bank of Taiwan, financing from securities finance corporations or exploring other fund-raising methods that will increase available funds to the Company.

4. Market risk analysis

Market risk is the risk of potential economic value reduction for securities or financial contracts that the Company and subsidiaries hold due to the fluctuations of the market risk factors. Such factors include interest rates (including credit spread) and risk of equity securities, exchange rates and commodity risk.

The Company utilizes risk factor sensitivity and value at risk to measure and contain market risks. The Company also holds regular stress test to help the management understand the estimated influence on the income of investment portfolio under potential extreme events or circumstances.

(1) Risk factor sensitivity

Using product identification and analysis procedure held by the Company, the corresponding market risk factor can be determined. Individual risk factor's entire exposure can be measured by observing how the value of a financial instrument changes as each risk factor changes. The Company and subsidiaries monitor the following risk factor sensitivities:

- A. Interest rate risk sensitivity: measured by the change of present value of future cash flows of the measured holding with each yield curve or credit spread moved 0.01% horizontally.
- B. Equity securities risk sensitivity: measured by the change of the value of investment portfolio with the price of the underlying assets linked to the equity securities, which could be divided into two types by distribution of financial instrument:
 - (a) Equity delta: measured by the change of present value of stock with the price of the underlying assets linked to the equity securities. (As the potential loss amount given that the TAIEX and stock of respective companies drop 1%).

(b) Debt delta: measured by the change of present value of bond with the price of the underlying assets linked to the debt securities. (As the potential loss amount given that the beneficiary certificates and funds, included preferred stocks and bond ETF drop 1%).

C. Exchange rate risk sensitivity: measured by the change of present values of corresponding holdings of currencies with exchange rate for each currency (As the potential loss amount given that the foreign currencies depreciate 1% against NTD).

D. Commodity risk sensitivity: measured by the change of the fair value of related commodities with the fair value of other kinds of commodities (As the potential loss amount given that the fair value decreases 1%).

The risk sensitivities in the investment portfolio held by the Company and subsidiaries are as follows:

Comparisons of risk sensitive factors

Risk sensitivity	12/31/25	12/31/24
Interest rate risk	\$6,430	\$3,098
Equity securities risk		
Equity delta	6,048,266	5,736,654
Debt delta	(353,461)	56,195
Exchange rate risk	1,393,823	1,815,984
Commodity risk sensitivity	138	(31,870)

(2) Risk value

Risk value (“VAR”) is a statistical measurement used to measure the maximum potential loss of a portfolio in a certain future time horizon and confidence level. The Company and subsidiaries use parametric in estimating a value at risk at 99% of confidence interval at duration of 1 day. This means that among 100 trading days, 1 trading days might see the loss of the positions exceeding the value at risk estimated the day before. The Company and subsidiaries continue to conduct back testing daily to ensure the reliability of the estimations made by the risk value model.

The comparison of risk value in the investment portfolio held by the Company and subsidiaries are as follows:

Risk type	For the year ended December 31, 2025			12/31/25
	Average VAR	Minimum VAR	Maximum VAR	Ending VAR
Equity securities	\$202,630	\$99,477	\$564,528	\$147,637
Interest rate	252,475	131,824	555,012	204,448
Exchange rate	95,071	39,471	285,984	78,880
Commodity	13,523	431	41,267	23,011

English Translation of Consolidated Financial Statements Originally Issued in Chinese

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Risk type	For the year ended December 31, 2024			12/31/24
	Average VAR	Minimum VAR	Maximum VAR	Ending VAR
Equity securities	\$183,908	\$92,231	\$403,124	\$103,299
Interest rate	211,402	104,858	382,515	170,580
Exchange rate	63,533	40,803	92,711	59,922
Commodity	19,455	423	67,159	13,225

(3) Stress test

Stress test is one of the risk management tools. It mainly measures the effects on profit/loss of extreme changes in market risk factors in an investment portfolio, helping a company's Board of Directors and management understand how potential extreme incidents can affect the market risk sensitivity and the profit/loss of an investment portfolio.

The main methods of stress test are historic and hypothetical scenario analysis. The test results are reported to Risk Management Committee and Board of Directors periodically.

5. Fair value of financial instruments

(1) Types of financial instruments

Financial Instruments	12/31/25	12/31/24

Financial liabilities measured at amortized cost (Note 2)	523,236,910	420,522,978
Total	<u>\$560,182,543</u>	<u>\$451,825,288</u>

Note 1: Financial assets measured at amortized cost include cash and cash equivalents excluding cash on hand, investment in bonds with reverse repurchase agreements, accounts receivable, securities margin loans receivable, refinancing margin, refinancing deposits receivable, trading securities receivable, customer margin accounts, stock borrowing collateral price, security lending deposits, other current assets, financial assets measured at amortized cost-non-current and other non-current assets.

Note 2: Financial liabilities measured at amortized cost include short-term borrowings, commercial papers payable, liabilities for bonds with repurchase agreements, short sale margins, payables for short sale collateral received, guarantee deposit received from security lending, futures customers' equity, equity for each customer in the account, accounts payable, amount collected for other parties, other payable, other financial liabilities-current, other current liabilities, lease liabilities including current and non-current, bonds payable including one due within one year and guarantee deposits received.

(2) Valuation techniques and assumptions in estimating fair value

The Company and subsidiaries adopt the following methods and assumptions in estimating the fair value of financial instruments:

- A. Financial assets and financial liabilities measured at amortized cost of a short-term financial instrument is measured by its book value on the balance sheet. Short-term financial instruments usually expire soon and therefore it is reasonable to use their book value to estimate their fair value.
- B. For financial assets and liabilities measured at fair value through profit or loss and financial assets measured at fair value through other comprehensive income, their market prices should be their fair values when there are standard conditions and open quotes available in an active market; if there is no open quote available in active market, then the fair value can be determined through self-evaluation, using evaluation methods, model assumption and metrics similar to the ones used by market participants towards the financial assets. Discounted cash flow method is used to evaluate financial liability products when there is no quote available from an active market. The discount rate equals the return rate of the financial liability products with identical terms and characteristics in the market, including the debtor's credit record, interest frequency and the contract's remaining duration, etc.
- C. Transactions of derivatives are evaluated using evaluation models while non-option derivatives are evaluated using discounted cash flow method. Options are evaluated using Black-Scholes Model. The market metrics used in such evaluations come from market price information in the centralized market and independent and trustworthy financial information institutions such as stock exchange, futures exchange, GreTai Securities Market, Reuters and Bloomberg. Prices are based on the market average price calculated from closing price, final settlement price and the quoted prices in active markets that is collected regularly.

D. Due to the uncertain duration, fair values of the guaranteed deposits of other non-current assets and liabilities are measured by its book value.

E. Fair value of bonds payable is measured by the discounted predicted cash flows. The discounted rate is based on the similar terms (similar due date).

(3) Financial assets measured at amortized cost

Excluding the following items, the book value of the Company and subsidiaries' financial instruments measured at amortized cost is the reasonable approximation of their fair value. The fair value of the other financial assets and liabilities measured at amortized cost is as follows:

	12/31/25		12/31/24	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
<u>Financial assets</u>				
Financial assets measured at amortized cost	\$-	\$-	\$160,326	\$160,025
<u>Financial liabilities</u>				
Long-term liabilities-current portion	3,600,000	3,579,484	-	-
Bonds payable	5,700,000	5,710,370	9,300,000	9,154,244

(4) Hierarchy of financial instruments at fair value

A. Definitions of fair value hierarchy

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities accessible at the measurement date.

Level 2: inputs other than quoted prices included within level 1 that are observable, either directly or indirectly, from an active market.

Level 3: inputs that are not based on observable inputs from an active market.

For assets and liabilities measured at fair value on a recurring basis, the Company re-evaluates their classification at every end of the reporting period to determine the amount of any transfer between different levels of the fair value hierarchy.

KGI SECURITIES CO. LTD. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

Note 1: The classification of the chart above is consistent with the one of the balanced sheets.

Note 2: While using valuation model to measure the fair value, if the inputs include observable market data and unobservable parameters, the Company and subsidiaries should determine if the inputs will have material effect on the measurement of fair value. If the unobservable inputs have material effect on the measurement, the fair value should be classified as level 3.

(A) Transfers between Level 1 and Level 2 during the period at recurring basis

There are no transfers between Level 1 and Level 2 for the years ended of December 31, 2025 and 2024.

(B) Reconciliation for level 3 fair value measured at recurring basis

The beginning balances and ending balances of financial assets and liabilities measured on a recurring basis at level 3 of fair value hierarchy are reconciled as follows:

a. Reconciliation for fair value assets measurements in Level 3 of the fair value hierarchy changes

For the year ended December 31, 2025

Financial instruments measured at fair value	Beginning balances (A)	Amounts recognized (B)		Increase (C)		Decrease (D)		Ending balances (E)=(A)+(B)+(C)+(D)
		in profit or loss	in OCI	Acquisition	Transfer to Level 3 (Note 1)	Disposal	Transfer out of Level 3 (Note 2)	
Financial Assets								
<u>Derivative instruments</u>								
Financial assets measured at FVTPL	\$-	\$48,174	\$-	\$506,642	\$-	\$(876)	\$-	\$553,940
<u>Non-derivative instruments</u>								
Financial assets measured at FVTPL	4,060,998	334,720	-	899,599	24,819	(83,216)	(34,183)	5,202,737
Financial assets measured at FVOCI	21,459	-	(1,715)	-	-	(19,744)	-	-

For the year ended December 31, 2024

Financial instruments measured at fair value	Beginning balances (A)	Amounts recognized (B)		Increase (C)		Decrease (D)		Ending balances (E)=(A)+(B)+(C)+(D)
		in profit or loss	in OCI	Acquisition	Transfer to Level 3 (Note 1)	Disposal	Transfer out of Level 3 (Note 2)	
Financial Assets								
<u>Derivative instruments</u>								
Financial assets measured at FVTPL	\$310	\$5,234	\$-	\$1,187	\$-	\$(6,731)	\$-	\$-
<u>Non-derivative instruments</u>								
Financial assets measured at FVTPL	3,613,204	289,005	-	320,549	-	-	(161,760)	4,060,998
Financial assets measured at FVOCI	21,077	-	382	-	-	-	-	21,459

Note 1: Some of the Company's equity investments have been transferred to Level 3 because observable market data for these investments changed from being available to unavailable..

Evaluation process for level 3 fair value measurements

When fair value for a financial instrument is not accessible or does not have any active market, the Company follows its “Asset valuation operation procedures”. The risk management department evaluates whether the fair value is reasonable, and the accounting department recognizes the instrument according to their conclusion.

- (5) The fair value hierarchy of assets not measured in, but required to disclose fair value

12/31/25

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
<u>Financial assets</u>				
Financial assets measured at				
amortized cost-non-current	\$-	\$-	\$-	\$-

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

6. Transfer of financial assets

(1) Transferred financial assets that are not derecognized in their entirety

In the Company and subsidiaries' daily operational transactions, most transferred financial assets that are not derecognized in their entirety are either liabilities for bonds with attached repurchase agreements to serve as pledge for opposing party, or lent securities based on securities lending agreements. Such transactions are pledged margin loans in their nature, securities are transferred to opponents when transactions occur. Therefore, cash flows from the securities are also transferred, the Company and subsidiaries recognize only the liabilities arising from the responsibilities of repurchasing those bonds at fixed or market price in the future. In the effective period of mentioned transactions, the Company and subsidiaries are not allowed to use, sell, or pledge those transferred financial assets, but still retain their interest rate risk, credit risk, and market risk, so they are not derecognized in their entirety.

Information on financial assets and related financial liabilities that are not derecognized in their entirety:

12/31/25					
Financial assets	Carrying amount of transferred financial assets	Carrying amount of related financial liabilities	Fair value of transferred financial assets	Fair value of related financial liabilities	Fair value of net position
Financial assets measured at FVTPL Collateralized transactions	\$40,099,034	\$39,329,737	\$40,099,034	\$39,329,737	\$769,297
Financial assets measured at FVOCI Collateralized transactions	35,742,256	33,575,415	35,742,256	33,575,415	2,166,841
Financial assets measured at amortized cost Collateralized transactions	8,903,185	8,957,266	8,903,185	8,957,266	(54,081)

12/31/24					
Financial assets	Carrying amount of transferred financial assets	Carrying amount of related financial liabilities	Fair value of transferred financial assets	Fair value of related financial liabilities	Fair value of net position
Financial assets measured at FVTPL Collateralized transactions	\$33,067,939	\$32,397,596	\$33,067,939	\$32,397,596	\$670,343

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(2) Transferred financial assets that are derecognized in their entirety

The Company engages in asset swap transactions through trading convertible bonds, acquired through underwriting or dealing, sells them to opponent, and receives consideration. Within contract period, the Company swaps with opponent agreed interest return for interest and interest premium derived from the convertible bond. Also, the Company has the right to repurchase the convertible bond at any time before maturity date. The Company does not retain control on transferred asset because the transaction opponent can sell the financial asset to a third party, and there is no need to impose any restriction on the third party when such transfer occurs. The Company only retains the option to buy the trade object. The maximum exposure to loss is the book value of the asset.

The following table analyzes information of transferred financial assets that are derecognized in their entirety and related financial liabilities:

Period	Type of continuing involvement	Cash outflow of repurchasing transferred (derecognized) financial assets	Carrying amount of continuing involvement in statement of financial position	Fair value of continuing involvement		Maximum exposure to loss
			Financial assets measured at fair value through profit or loss	Asset	Liability	
12/31/25	Long call option	\$16,947,300	\$2,744,278	\$2,744,278	\$-	\$2,744,278
12/31/24	Long call option	\$15,132,100	\$2,401,139	\$2,401,139	\$-	\$2,401,139

The following table discloses a maturity analysis of the undiscounted cash outflows of repurchasing transferred (derecognized) financial assets. Information on cash flow is based on circumstances of each financial reporting date.

Period	Type of continuing involvement	Spot	In 3 months	3-12 months	1-5 years	Over 5 years	Total
12/31/25	Long call option	\$-	\$453,500	\$4,789,400	\$11,704,400	\$-	\$16,947,300
12/31/24	Long call option	\$-	\$337,200	\$2,341,300	\$12,453,600	\$-	\$15,132,100

For the type of continuing involvement “long call option”, the following table discloses the gain or loss recognized at the date of transfer of the assets, and income and expenses recognized, both in the reporting period and cumulatively, from the Company’s continuing involvement in the derecognized financial assets.

Period	Type of continuing involvement	Gain or loss recognized at the date of transfer	Income and expenses recognized in the reporting period	Income and expenses recognized cumulatively
12/31/25	Long call option	\$1,952	\$(598,789)	\$(596,837)
12/31/24	Long call option	\$57,839	\$(500,501)	\$(442,662)

KGI SECURITIES CO. LTD. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

7. Offsetting financial assets and financial liabilities

The disclosure requirements in IFRS 7 for offsetting financial assets and financial liabilities do not apply to the Company and subsidiaries' transactions on derivative instrument assets and derivative instrument liabilities. The Company and subsidiaries are allowed to offset the mentioned instruments only in the event of default and insolvency or bankruptcy.

The Company and subsidiaries enter with opponent into collateralized liabilities for bonds with repurchase agreements, in which the Company and subsidiaries provide securities as collaterals. The Company and subsidiaries also enter with opponent into collateralized bond investments under resell agreements, in which the Company and subsidiaries receive securities as collaterals (that are not recognized in statement of financial position). Only in the event of default and insolvency or bankruptcy are these transactions allowed to set off, they do not meet the offsetting criterion in international accounting standards. Hence, the related liabilities for bonds with repurchase agreements and investments in bonds with reverse repurchase agreements are reported separately in the statement of financial position.

The following tables disclose information on offsetting of financial assets and financial liabilities mentioned above:

12/31/25						
Financial assets subject to offsetting, enforceable master netting arrangement or similar agreements						
Description	Gross amount of recognized financial assets (a)	Gross amount of recognized financial liabilities set off in the statement of financial position (b)	Net amounts of financial assets presented in the statement of financial position (c)=(a)-(b)	Related amounts not set off in the statement of financial position(d)		Net amount (e)=(c)-(d)
				Financial instruments (Note 1)	Cash collateral received	
Derivative (Note 2)	\$8,343,807	\$-	\$8,343,807	\$-	\$1,331,315	\$7,012,492
Resell agreement	21,086,592	-	21,086,592	21,086,592	-	-
Total	\$29,430,399	\$-	\$29,430,399	\$21,086,592	\$1,331,315	\$7,012,492

12/31/25						
Financial liabilities subject to offsetting, enforceable master netting arrangement or similar agreements

Market risk	\$4,720,069	38.10%	\$3,899,532	36.34%
Credit risk	4,884,744	39.43%	4,024,192	37.51%
Operational risk	2,782,984	22.47%	2,805,634	26.15%
Total	\$12,387,797	100.00%	\$10,729,358	100.00%

9. Others

(1) The specific risk for futures dealer business

The futures dealer needs to maintain adequate liquidity in case its clients fail to fulfill the contracts in the futures transactions with the features of low financial leverage nature and unpredictable market fluctuation. If the dealing business fails to maintain the amount of margin, the open contracts may be closed. Thus, the margin may be lost entirely and may require further payment on deficiency.

(2) Restrictions and enforcement of the Company and subsidiaries' various financial ratios under ROC Futures Commission Merchant Laws.
